

Temple Allen's

SAM

[Standup Abrading Machine]

Family of Tools

Meet SAM, Temple Allen's Standup Abrading Machine. Artisans using SAM reduce re-work by generating a consistent, high-quality finish. By maintaining uniform abrasive pressure on the surface, the SAM tool yields the desired finish every time. Vibration exposure, high grip forces and fatigue are eliminated by SAM use so artisans can maintain a constant rate of work throughout the shift. Incorporating SAM tools into your surface preparation process requires minimal training and can help attract and retain skilled employees.

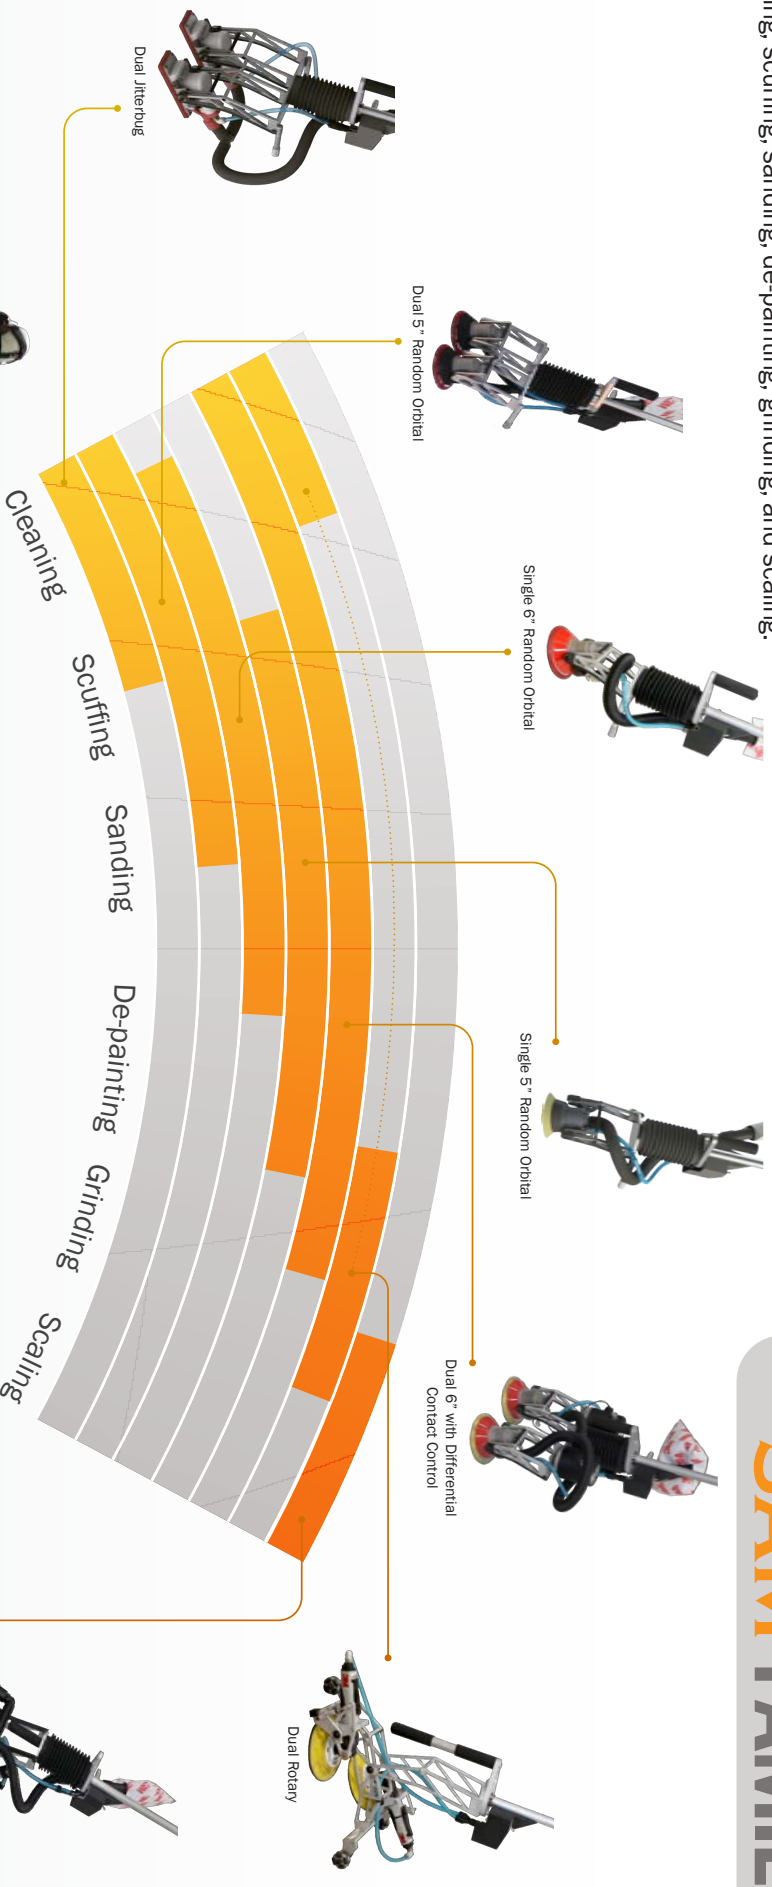

TEMPLE ALLEN INDUSTRIES

ROCKVILLE, MD | INFO@TEMPLEALLEN.COM | 301.541.3662

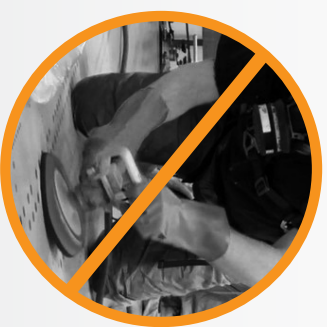

The SAM family brings predictable, high-quality finishing to a wide variety of applications: cleaning, scuffing, sanding, de-painting, grinding, and scaling.

SAM FAMILY
